

INDEX OF TABLES AND FIGURES

Tables

HUNGARIAN LABOUR MARKET

Table 1: The number of employees ..	22
Table 2: The number of employed and the potential labour force	29
Table 3: Net and real earnings calculated with the family tax relief	37

IN FOCUS

Table 1.2.1: Typical types of arguments concerning the issue of “labour shortage” in Hungarian public discourse, 2015–2017	58
Table 1.4.1: Extract from the labour market information matrix of the National Labour Office	75
Table K.1.5.1: The labour market history of public works participants in the Labour Force Survey of CSO in the one year as well as one and a half years following the first data collection	78
Table 2.1.1: Demographic replacement between 2001–2030, by educational attainment and gender (thousand persons)	88
Table 2.1.2: Demographic replacement between 2001–2030, by educational attainment and gender in proportion to the active age population of 2011 (percentage)	88
Table 2.2.1: The number of entrants to the labour market from education and from the labour market to retirement and/or incapacity according to estimates based on the Labour Force Survey of the CSO, 2006–2015 (thousand persons) ...	92
Table 2.3.1: The marginal effect of individual factors on employment abroad	99
Table 2.3.2: The marginal effect of individual factors on the return to the Hungarian labour market	100
Table A2.3.1: Transcoding ISCO–88 occupational groups and dividing them into groups	104
Table A2.3.2: Average exit, return and net labour migration rate of workers aged 18 years or more and below the retirement age, according to individual characteristics, 2006–2010 and 2011–2016	105
Table A2.3.3: The fit indices of the model	108
Table 3.1.1: “Has your company	

faced any difficulties resulting from labour shortage in the previous 12 months?” October 2016, logit estimation	111
Table 3.1.2: The estimation of wage increase intentions, October 2016, logit estimation	113
Table 3.2.1: The relationship of shortage indicators to key enterprise characteristics in 2016, logit marginal effects and fractional regression coefficients	117
Table 3.3.1: The average of shortage indicators and the number of cases in the sample analysed in this chapter	120
Table 3.3.2: The impact of the enterprise-level residual wage on the occurrence and the value of shortage indicators, 2015, probit marginal effects and linear regression coefficients	120
Table 3.3.3: The effect of the 2015 shortage indicators on the 2016 planned and 2015–2016 actual corporate average wage increase – robust regression coefficients	123
Table 4.1.1: The occupational composition of graduates from VET and VSS in 2011–2016, percentage ...	133
Table 4.1.2: The wage advantage of VSS graduates in various occupational groups compared to those with a lower secondary qualification at most (0–8 grades) in 2011–2016 (percentage)	134
Table 4.1.3: The proportions of vocational school and upper-secondary vocational school graduates and the wage advantage of the latter over the former in 2016	135
Table 4.1.4: Changes in ALL test scores according to age among manual workers who completed 11 or 12 grades	137
Table 4.1.5: The impact of the average score achieved in ALL on monthly wages among Hungarian workers who completed 9–12 grades	138
Table 4.2.1: Career plans of the 15 year olds in Hungary	143
Table 5.1.1: Non-cognitive skills belonging to the Big Five groups of skills	152
Table 5.2.1: The decisive factors of	

labour mobility – probit models with two outcomes	163
Table 5.2.2: Determining factors of the direction of labour mobility ..	164
Table A5.2.1: Aggregated occupational groups	166
Table 5.3.1: The participation of the working age population with a maximum of ten completed grades and not in education in various forms of adult learning – ALL, 2008	168
Table 5.4.1: Selection into training, by the year of training entry	174
Table 5.4.2: Selection into training, by the length of trainings	175
Table 5.4.3: The effect of training on the number of days spent in employment	179
Table 5.4.4: The effect of training on the number of days spent in employment, by educational level and the length of training	180
POLICY TOOLS	
Table A1: Expenditures and revenues of the employment policy section of the national budget, 2011–2017 (mHUF)	194
STATISTICAL DATA	
Table 1.1: Basic economic indicators	199
Table 2.1: Population	201
Table 2.2: Population by age groups, in thousands	201
Table 2.3: Male population by age groups, in thousands	203
Table 2.4: Female population by age groups, in thousands	203
Table 3.1: Labour force participation of the population over 14 years, in thousands	204
Table 3.2: Labour force participation of the population over 14 years, males, in thousands	205
Table 3.3: Labour force participation of the population over 14 years, females, in thousands	206
Table 3.4: Labour force participation of the population over 14 years, per cent	207
Table 3.5: Labour force participation of the population over 14 years, males, per cent	208
Table 3.6: Labour force participation of the population over 14 years, females, per cent	209

Table 3.7: Population aged 15–64 by labour market status (self-categorised), in thousands	210	by duration of job search	226	education by gender, age groups, level of education and industries	243
Table 3.8: Population aged 15–64 by labour market status (self-categorised), per cent	211	Table 5.7: Registered unemployed and LFS unemployment	228	Table 7.1: Graduates in full-time education	246
Table 4.1: Employment	212	Table 5.8: Composition of the registered unemployed by educational attainment, yearly averages	229	Table 7.2: Pupils/students entering the school system by level of education, full-time education	247
Table 4.2: Employment by gender ..	213	Table 5.9: The distribution of registered unemployed school-leavers by educational attainment, yearly averages, per cent	229	Table 7.3: Students in full-time education	248
Table 4.3: Composition of the employed by age groups, males	214	Table 5.10: Registered unemployed by economic activity as observed in the LFS, per cent	229	Table 7.4: Students in part-time education	248
Table 4.4: Composition of the employed by age groups, females	214	Table 5.11: Monthly entrants to the unemployment register, monthly averages, in thousands	230	Table 7.5: Number of applicants for full-time high school courses	249
Table 4.5: Composition of the employed by level of education, males, per cent	215	Table 5.12: Selected time series of registered unemployment, monthly averages	231	Table 8.1: The number of vacancies reported to the local offices of the NFSZ	250
Table 4.6: Composition of the employed by level of education, females, per cent	215	Table 5.13: The number of registered unemployed who became employed on subsidised and non-subsidised employment	232	Table 8.2: The number of vacancies reported to the local offices of the NFSZ, by level of education	251
Table 4.7: Employed by employment status, in thousands	216	Table 5.14: Benefit recipients and participation in active labour market programmes	233	Table 8.3: The number of vacancies	251
Table 4.8: Composition of the employed persons by employment status, per cent	216	Table 5.15: The ratio of those who are employed among the former participants of ALMPs, per cent	234	Table 8.4: Firms intending to increase/decrease their staff	252
Table 4.9: Composition of employed persons by sector, by gender, per cent	217	Table 5.16: Distribution of registered unemployed, unemployment benefit recipient and unemployment assistance recipients by educational attainment	235	Table 9.1: Regional inequalities: Employment rate	253
Table 4.10: Employed in their present job for 0–6 months, per cent	217	Table 5.17: Outflow from the Register of Beneficiaries	236	Table 9.2: Regional inequalities: LFS-based unemployment rate ..	254
Table 4.11: Distribution of employees in the competitive sector by firm size, per cent	218	Table 5.18: The distribution of the total number of labour market training participants	236	Table 9.3: Regional differences: The share of registered unemployed relative to the economically active population, per cent	255
Table 4.12: Employees of the competitive sector by the share of foreign ownership, per cent	218	Table 5.19: Employment ratio of participants ALMPs by gender, age groups and educational attainment for the programmes finished in 2016, per cent	237	Table 9.4: Annual average registered unemployment rate by counties ..	256
Table 4.13: Employment rate of population aged 15–74 by age group, males, per cent	219	Table 5.20: Distribution of the average annual number of those with no employment status who participate in training categorised by the type of training, percentage	237	Table 9.5: Regional inequalities: Gross monthly earnings	257
Table 4.14: Employment rate of population aged 15–74 by age group, females, per cent	219	Table 5.21: The distribution of those entering training programmes by age groups and educational level	238	Table 9.6: Regression-adjusted earnings differentials	257
Table 4.15: Employment rate of population aged 15–64 by level of education, males, per cent	220	Table 6.1: Annual changes of gross and real earnings	239	Table 9.7: Regional inequalities: Gross domestic product	258
Table 4.16: Employment rate of population aged 15–64 by level of education, females, per cent	221	Table 6.2.a: Gross earnings ratios in the economy	240	Table 9.8: Commuting	258
Table 5.1: Unemployment rate by gender and share of long term unemployed, per cent	222	Table 6.2.b: Gross earnings ratios in the economy, per cent	241	Table 10.1: Strikes	261
Table 5.2: Unemployment rate by level of education, males, per cent ...	223	Table 6.3: Regression-adjusted earnings differentials	242	Table 10.2: National agreements on wage increase recommendations	261
Table 5.3: Composition of the unemployed by level of education, males, per cent	223	Table 6.4: Percentage of low paid workers by gender, age groups, level of education and industries	243	Table 10.3: Single employer collective agreements in the business sector	262
Table 5.4: Unemployment rate by level of education, females	224			Table 10.4: Single institution collective agreements in the public sector	262
Table 5.5: Composition of the unemployed by level of education, females, per cent	224			Table 10.5: Multi-employer collective agreements in the business sector	262
Table 5.6: The number of unemployed				Table 10.6: Multi-institution collective agreements in the public sector	262

of affected firms, and the number of covered companies and employees	263	Table 10.9: The share of employees covered by collective agreements, percent	263	Table 10.10: Single employer collective agreements in the national economy	264	Table 10.11: Multi-employer collective agreements in the business sector	265	Table 11.1: Family benefits	266	Table 11.2: Unemployment benefits and average earnings	266	Table 11.3.a: Number of those receiving pension, and the mean sum of the provisions they received in January of the given year	267	Table 11.3.b: Number of those receiving pension, and the mean sum of the provisions they received in January of the given year	267	Table 11.4.a: Number of those receiving social annuities for people with damaged health, and the mean sum of the provisions they received after the increase, in January of the given year	268	Table 11.4.b: Number of those receiving social annuities for people with damaged health, and the mean sum of the provisions they received after the increase, in January of the given year, from 2015	268	Table 11.5: The median age for retirement and the number of pensioners	269	Table 11.6: The number of those receiving a disability annuity and the mean sum of the provisions they received after the increase, in January of the given year	270	Table 11.7: Newly determined disability pension claims and detailed data on the number of newly determined old-age pension claims	270	Table 11.8: Retirement age threshold	271	Table 12.1: The mean, minimum, and maximum value of the personal income tax rate, per cent	272	Table 12.2: Changes in the magnitude of the tax wedge in the case of minimum wage and the temporary work booklet (AMK)	273	Table 12.3: The monthly amount of the minimum wage, the guaranteed wage minimum, and the minimum pension, in thousands of current-year HUF	274	Table 12.4: The tax burden on work as a ratio of tax revenue and earnings	275	Table 13.1: Employment and unemployment rate of population aged 15–64 by gender in the EU	276	Table 13.2: Employment composition of the countries in the EU	277	Table 13.3: The ratio of unfilled vacancies to the sum of all (filled or unfilled) jobs., IV. quarter	278	FIGURES		HUNGARIAN LABOUR MARKET		Figure 1: The number of persons employed and the employment rate of the age group 15–64	20	Figure 2: Number of job vacancies in the business sector	24	Figure 3: The calculated rate of public workers aged 15–64 within the employed (percentage), 2016	26	Figure 4: The average length of job search (month, right axis) and the share of long-term jobseekers (percentage, left axis)	27	Figure 5: Unemployment in the regions of Hungary, 2006–2016	28	Figure 6: Evolution of unemployment and average search intensity	29	Figure 7: The evolution of per capita monthly gross earnings (thousand HUF)	31	Figure 8: The evolution of gross earnings and the minimum wage (2008 = 100 percent)	33	Figure 9: The situation of counties in the context of the employment rate of the age group 15–64 and the gross salary 2016	37	IN FOCUS		Figure 1.1.1: Incidence of the phrases “labour shortage” and “skill shortage” on the Internet	49	Figure 1.1.2: Two economies in the space of unemployment (U) and vacancies (V)	52	Figure 1.1.3: Equilibrium in the UV space	53	Figure 1.2.1: The number of articles containing “labour shortage” on the news portals index.hu, origo.hu, mno.hu and magyaridok.hu between 2010 and August	58	Figure 1.3.1: Number of vacancies reported by the National Labour Office, 1990–2016	63	Figure 1.3.2: Vacancies as a percentage of total jobs according to the CSO survey 2006–2016	64	Figure 1.3.3: The proportion of vacancies according to Eurostat data in 12 countries, 2006–2016	64	Figure 1.3.4: The proportion of vacancies in the fourth quarter of 2016 according to Eurostat	65	Figure 1.3.5: The proportion of vacancies in some sectors	66	Figure 1.3.6: The proportion of businesses reporting labour and skilled worker shortage as an obstacle to business activity, 2000 – 2017	67	Figure 1.3.7: The proportion of businesses reporting both labour and skilled worker shortage as an obstacle to business activity, 2011 – 2017 (percentage)	68	Figure 1.3.8: The proportion of businesses reporting labour shortage as an obstacle to business activity broken down to economic sectors, in the EU and Hungary, 2007–2017 (percentage)	69	Figure 1.3.9: The proportion of businesses reporting labour shortage as an obstacle to business activity broken down to economic sectors in Hungary, 2007–2017	69	Figure 1.3.10: The proportion of businesses in the EU member states finding it difficult to hire appropriately skilled employees, 2013	70	Figure 1.3.11: The proportion of businesses reporting labour shortage broken down to level of experience of workers they find difficult to recruit, 2016 and 2017 (per cent) ..	71	Figure A1.3: Vacancies in two sectors as a percentage of the total number of jobs, 2006–2016	72	Figure
